INSTITUTE FOR LOCAL SELF RELIANCE**

UTILITY INFORMATION REQUEST

Docket Number: ET-2, E-002/CN-06-1115

Date of Request: 3/21/2008

Requested From: CAPX Utilities

Response Due: 4/11/2008

Analyst Requesting Information: Michaud

REQUEST NUMBER: 14

If you feel that your responses are trade secret or privileged, please indicate this in your responses.

In your response to IR #2 from Wind on the Wires, et al, on page 3 it states:

“The Minnesota Valley – Panther – McLeod 230 kV reconductoring project was removed because rebuilding or replacement of the Minnesota Valley –Blue Lake 230 kV line is the next step in developing further outlet capacity. Additionally, further analyses have determined that identified outlet capacity level can be achieved for the Buffalo Ridge Area without reconductoring the line based on upgrades that have taken place.”

- A. Please identify these “upgrades that have taken place” their voltage, installation date, terminating substations, etc, and the reason for their construction.
- B. Were any adjustments to assumed generation locations a part of the determination that reconductoring this line would not be necessary? If so describe these in detail.
