In the CAPX Vision Study, Appendix A-1 of the Application, Table 2, page 9, provides a description of various generation scenarios that were incorporated into the study.

- A. Please provide an expanded version of Table 2 that lists for each generation area and for each of the three bias scenarios, 1) each specific generation location (including bus name & number, bus voltage, and geographic common name), 2) the amount of Megawatts sited at that location, and 3) the fuel type assumed for the location.
  
- B. For each generation location provide a short discussion of why that particular location and generator size was selected for this study.
