FREEDOM OF INFORMATION ACT REQUEST

I am making this Freedom of Information Act Request regarding the USDA RUS Dairyland Power Cooperative Q-1D South project, a transmission line upgrade of an older 161 kV transmission line running from the Briggs Road substation in Holmen, WI, south roughly 9 miles to an unknown terminus.

Please note this is NOT in reference to the Marshland - Briggs Road Q-1D project. This is running to the south of that project from the Briggs Road substation.

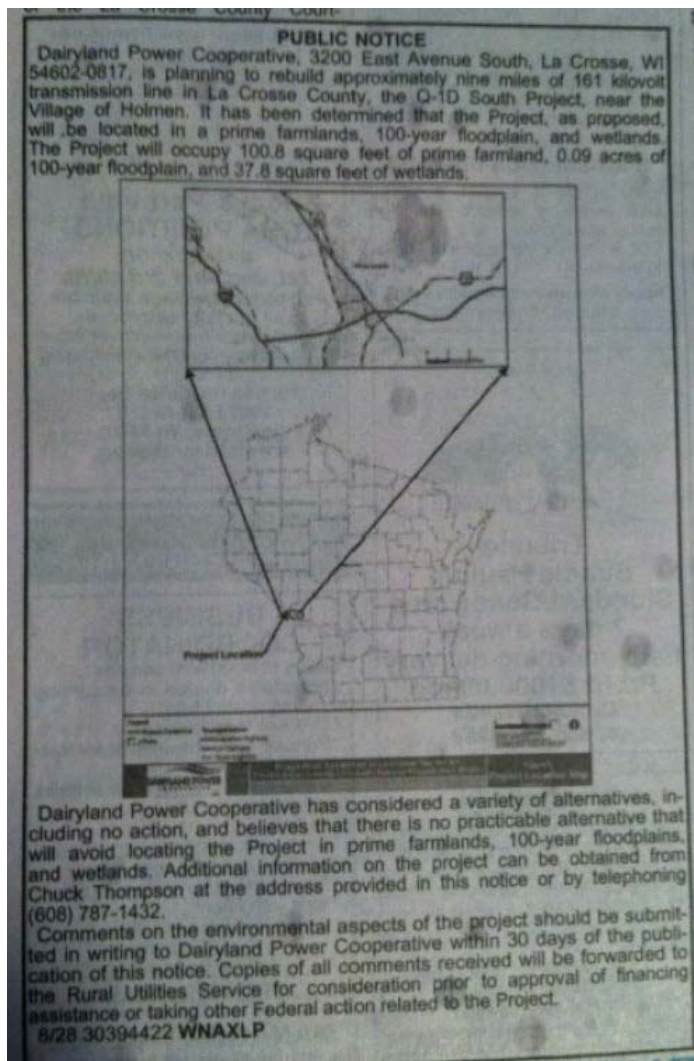

I am looking for DPC's application to USDA/RUS for this project, a decent map of the project showing sufficient detail to tell where it is going, the cost estimates and any other documents you may have regarding this project, particularly including notifications to landowners and public meetings and meetings with governmental bodies/local units of government and the Wisconsin Public Service Commission and Federal Airport Administration regarding this project.

Attached and below is the notice published in the La Crosse Tribune on Friday, August 28, 2015.

Please let me know if you have any questions. I will submit a Request for Waiver upon verification that I've reached the proper USDA RUS FOIA Office.

Thank you for your attention to this request,

Carol A. Overland
for No CapX 2020
